# 01

Founded in 1934, our family-run business with its deep-rooted history, located within the region of East Westphalia in Herzebrock, has through consecutive generations continued to develop and create innovative technology and new ideas for our customers.

Situated near the picturesque Teutoburg Forest with its famous Hermann Monument, we proudly develop new ideas for companies across the globe. Our customers trust our employees, their knowledge and experience to produce tools of the highest quality and technical precision.

As an independent manufacturer, along with our passion for technology, we continue to develop new and innovative ideas.

Welcome to the ideenmanufaktur.

## 02 | ideacharacters

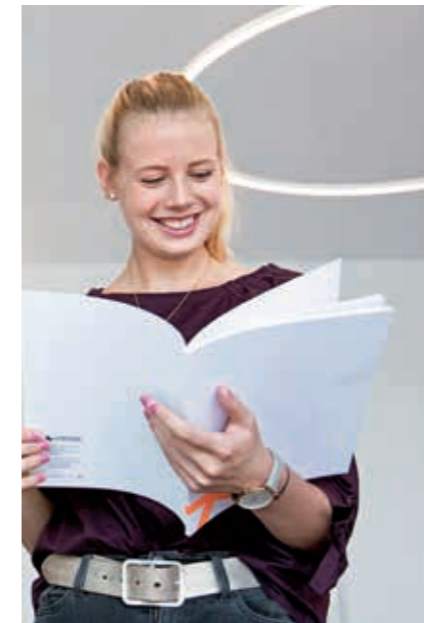

## 02

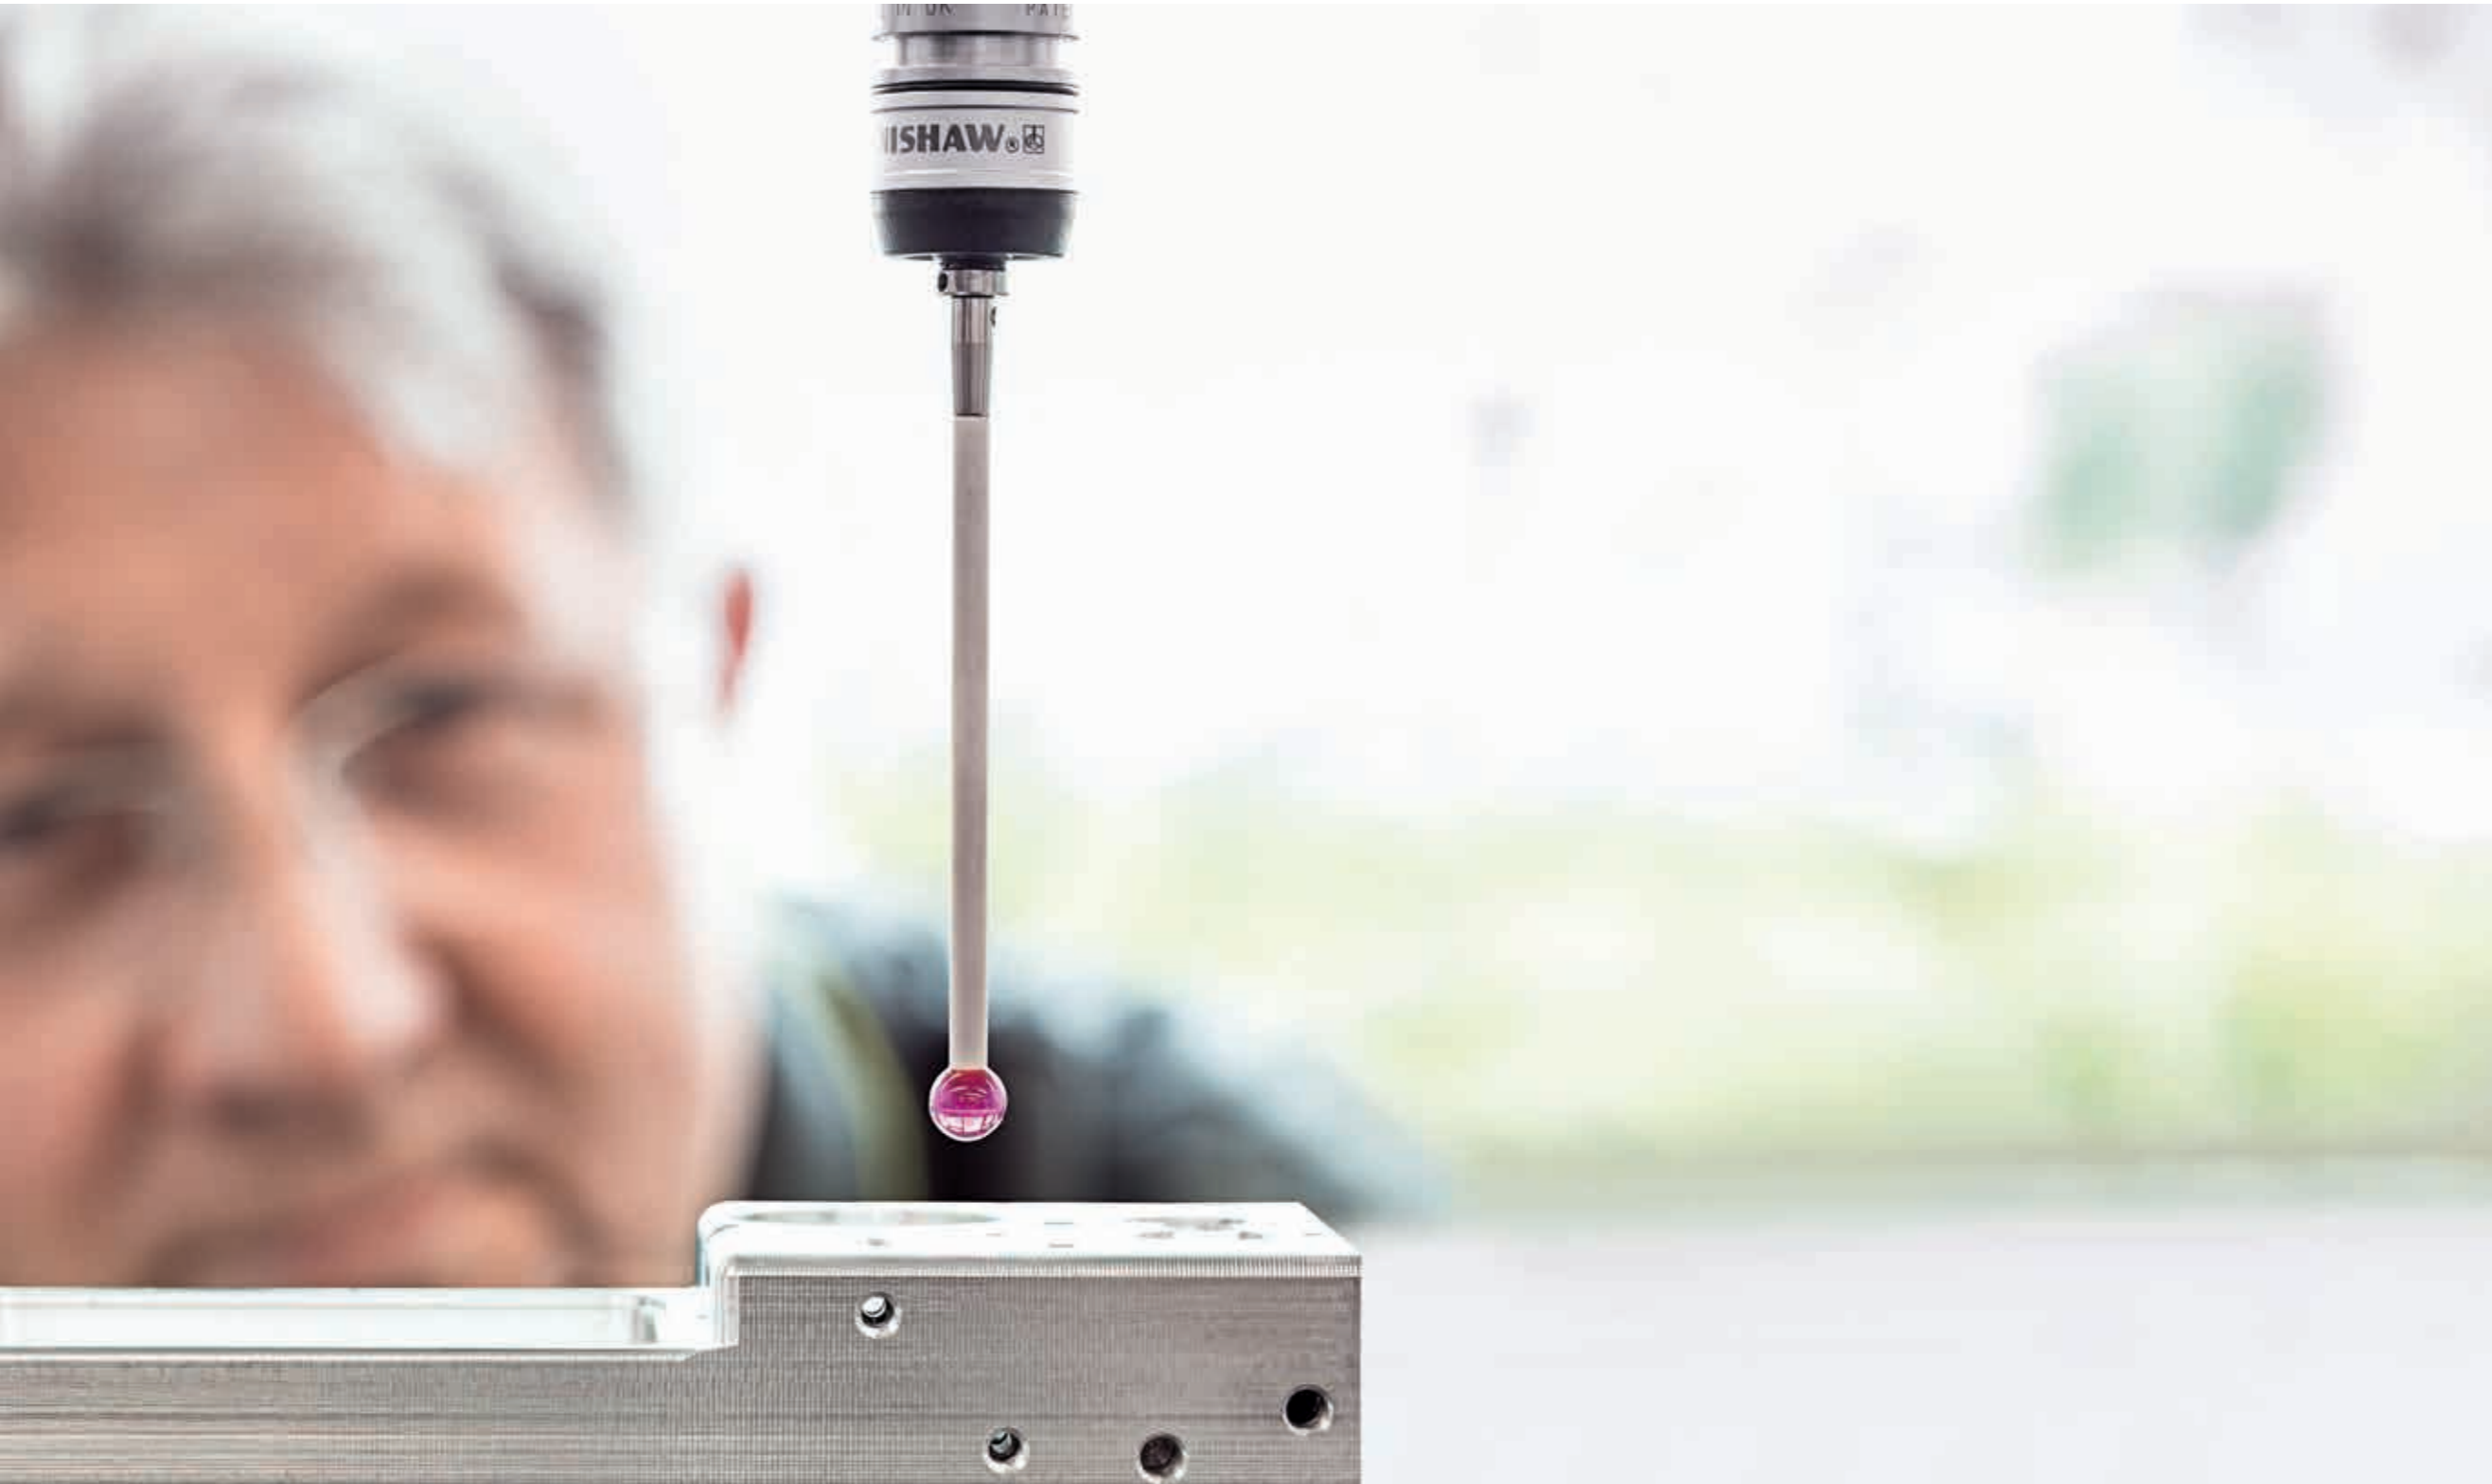

Passion for technology is in our culture which our workforce proudly lives and breathes. We pursue ideas in the East Westphalian way: determined, enduring and resolute. Characteristics we are very proud of.

Each day we create ideas with and on behalf of our customers, because it is our customers who achieve extraordinary results with our tools. We are continuously in contact with our customers in an ongoing creative exchange of new ideas and impulses. We also explore other business and production sectors in which our tools can be utilised. Our work incorporates all of these aspects, details and developments. Every day: Mehr als eine Idee mehr.

# 03 | manufacturingpassion

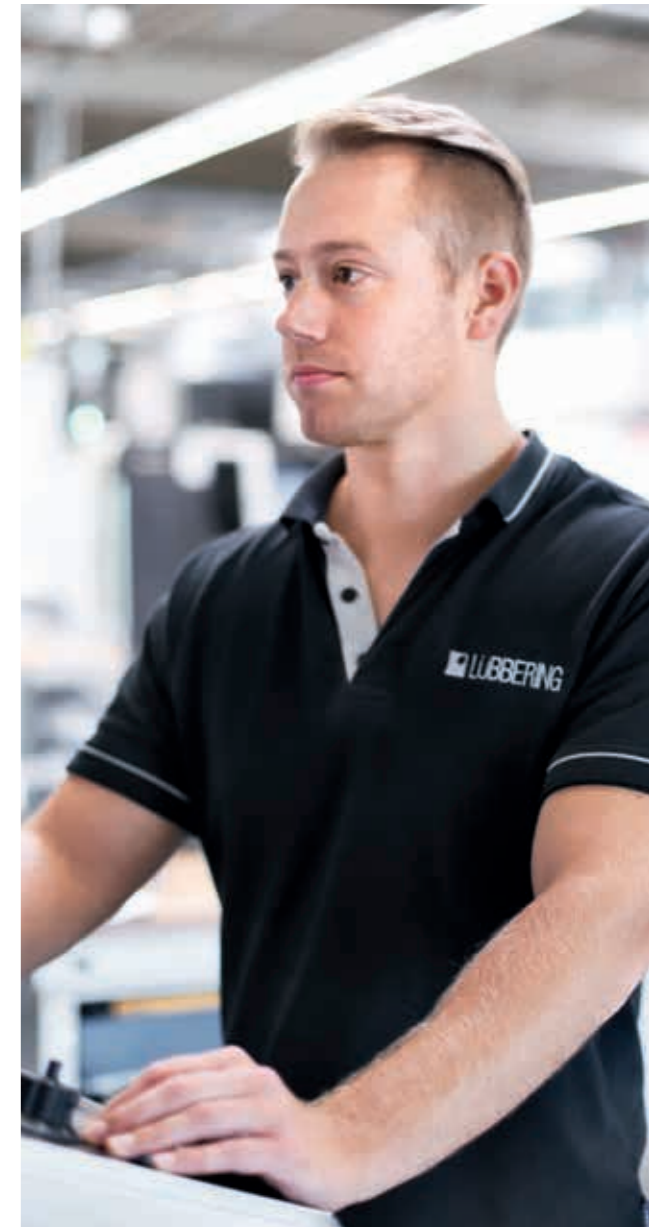

### 03

To this present day, we continue to manufacture our products on our original premises. We supply customers across the globe but our products are developed and produced locally. We pay close attention to the finest of detail in our development and production processes. Our tools leave our premises as expected by our customers. In perfection.

Our modern and technologically advanced manufacturing facilities constantly set new standards in the production of high precision mechanical parts. Precision machinery and a flexible production capacity guarantee maximum efficiency with regard to conserving resources. These are our distinguishing features as a leading, pioneering tool manufacturer. However, as essential as technology is, we know our workforce is indispensable. With their many years of professional experience, with an attentive eye for detail and a passion for perfection, our employees are masters of their trade. Because of this harmony between technology and people, we proudly say we are true craftsmen.

# 04 | manufacturing results

# 04

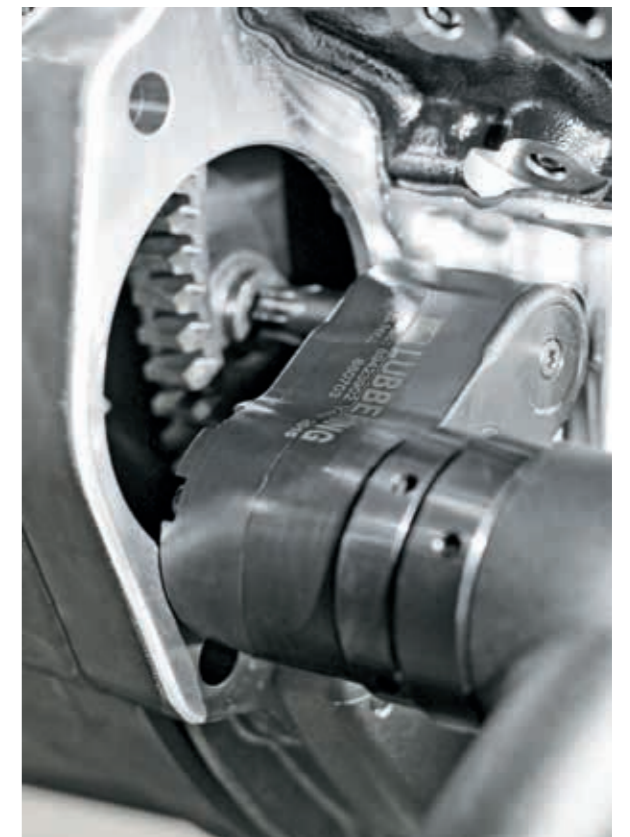

Every tool we manufacture is a workforce achievement. However, our long-term experience is not the whole story. We see our ideenmanufaktur as a steady, creative process, based on solidly embedded principles.

All over the world, assembly lines of well-known automotive and aerospace manufacturers use our high precision fastening and drilling tools. High repeating accuracy and globally unique lifetime are the results.

Numerous new product developments, such as our L.ADU drilling programme, has evolved from the close-knit relationship with our customers and partners.

With over 460,000 variable options, our L.SP3 geared offset head programme always offers the appropriate solution – from Hamburg to São Paulo.

05

The passion for our tools does not end at the final assembly. With many years of experience and a precise touch, the experts of our fastening laboratory take our tools to the next level. Our unique high precision fastening test station solves our customer's problems before they occur. We eliminate the running-in characteristic of geared mechanisms and offer our customers something they can only get in Herzebroch: Accuracy right from the start. A high dedication to quality, innovative strength and precision are features we share with our customers. We look for solutions in collaboration with our aerospace customers and specify machines, parameters and drills. Service is essential for the optimal use of our tools. Therefore, we support our customers with the best possible service and also set international standards in this sector.

# 06

We manufacture tools for customers in over 50 countries. Various leading international brands are proud to be our customers in East Westphalia. They have placed their trust in us for many years and contributed to the fact that today, we are the market leader for high precision fastening and drilling tools. Therefore, the proximity to customers is very important to us. At trade fairs or in-house exhibitions, on site with our ShowTruck or during one of our numerous training workshops, our experts meet customers from all over the world. Sharing ideas eye to eye.

# 07 | manufacturingculture

## 07

As a highly innovative company, we are also committed to our local heritage. Various activities and events bring us closer together – and stimulate fresh ideas. New countries. New sports. New artists. We arouse new interests of employees and people around us. This enthusiasm inspires all of us.

Open to new ideas. Each day.
