

Features of **⊕HTAKE** Automatic Screw / Bolt Feeders

⊕HTAKE's automatic screw feeders make use of a horizontal rail system. Supporting a wide range of materials and shapes, these units accommodate diverse workstyles and workpiece dimensions. The unique mechanism and advanced technology hugely contribute to the efficiency of your production line.

High-Speed and Smooth

Fixed Point Take Out

Fixed Quantity Take Out

⊕ Also supports screws with washers or special formats

Horizontal rail realizes the smooth feed of numerous types of special screws, among them those with washers and with short under-head length.

Other key features

- Easy to handle and operate: simply install once to get up and running. All you have to do is push the power switch.
- Adding screws is a snap. Simply insert in bulk in the scooping chamber.
- Takes 5 seconds with a single hex wrench to swap and accommodate the screw diameter changes (NJ/NSB type). Simply loosen the rail-tightening screws, swap in a new rail, and adjust the position while tightening the screws back into place.
- In the event that too many screws are inserted or have become clogged, the unit automatically cuts the power to the drive motor and shuts off.

Compatible to line changes for adjustments to screw diameter and shape Supporting QC and productivity improvements

Automatic screw feeders dramatically increase the speed of screw tightening work. Designed with ease of use in mind, and employing the world's first rail-swappable mechanism, these devices let you work with screws of varying diameters and formats. Even when changing workpiece entails different screw diameters, all you need to do is swap in a new rail. No need to replace the feed mechanism itself, which means reduction of equipment costs. Horizontal rail mechanism offers speedy and stable screw feeding. Highly versatile design and ease of use drive the high efficiency of screw tightening work.

⊕ Horizontal rail provides stable, orderly array of screws

Unlike gravity-based feed mechanisms, this one uses a vibration to convey screws in a horizontal rail. Does away with problems like screw clogging and stably feeds even screws with washers attached.

⊕ Average screw feed time is 2 per second

Achieve a three- to fivefold increase in working speed based on traditional manual work. Average screw take out of 2 per second greatly improves working efficiency.

⊕ Makes work easier

Now you can tighten screws with one hand, improving the stability and efficiency of assembly work.

⊕ Supports standard bits from various screwdriver manufacturers

No need to attach a specialized bit to electric screwdrivers. Immediately use standard bits you are accustomed to using. Conveys magnetized bits perpendicularly along the V-shaped groove of the bit guide, engaging the screw head and allowing it to be caught by simply pulling it close. Supports suction-style screwdrivers.

⊕ Accommodate different screw diameters by simply swapping rails

Simply swapping in the rail for a given screw diameter offers support for numerous screw types. For example, NSB models support up to 8 screw diameters in a single device.

Some models require exchanging parts in addition to swapping the rail.

Selection Process

1 Select by use

First, select your use from "manual," "robotic," and "fixed quantity take out."

2 Select by workpiece diameter

Select models based on the diameter of workpiece you use (as indicated by ●).

3 Select by workpiece length (based on the longest ones)

Select models based on the length of the workpiece—under-head length for feeders, and total length for screw hoppers.

4 Select by workpiece material

Select models based on the material of the workpiece.

Please have a look at the product page.

*For the screw hopper, the compatible length of the screw may differ from that of the feeder it is combined with. Please check their compatibility before use.
*Depending on the shape of the screw, the screw hopper may not be compatible with it.

*MHP-80 is compatible only with iron screws (due to the use of a magnet).

Signals obtained from signal line

Automatic screw feeder AC adapter plug formats

NJ / NJR Series All-around Screw Feeder

Supports a wider screw diameter than the NSB/NSR series and has greater capacity, making it even more useful.

Supported screw diameter M2.0 ~ M5.0	Supported screw under-head length Longest: 18 / 25mm	Capacity About 150 cc	Non-ferrous materials: supported
---	---	--------------------------	----------------------------------

*For details, please refer to each product's specifications section.

Manual	NJ-23	NJ-45	NJL-23	NJL-45	NJC-23	NJC-45
Robotic	NJR-23	NJR-45	NJRL-23	NJRL-45		

Supports standard bits from various screwdriver manufacturers

- Bit screwdrivers
- Suction screwdrivers

Large stock

Supports a stock of 150cc.

Special screws supported

Allows you to stably feed SW screws or those with washers.

Long-running operation when combined with screw hopper

Use a screw hopper for long-running unmanned operation.

Smooth screw feeding

- Provides ongoing, timely feed of screws to match robot operations.
- The NJ type allows for sending out the screw take-out signal through an external outlet.
- The NSR type allows for the sending out of a signal to notify whether a screw is present at a screw take-out point through an external outlet.

NJ Series: Swap rail set (passing plate, rail)

NJR Series: Swap rail set (passing plate, escaper, rail)

*NJ Series: Swap rail set (retainer plate for countersunk screws)

Sample applications / NJ + RR (rail for robotic devices)

Swap rails in/out.

This single unit supports a wide range of screws. For example, the NJ-23 supports four types of screw in a single unit. Allows for adjusting the angle of rail inclination based on the screw being used.

Example usage of combining NJ and RR rails

Use as a horizontal feeder for continuous feed to robotic devices. If you are seeking the same functionality in a different model, please contact us.

*If you are looking for equivalent parts for other models, please inquire.

NSB / NSR Series Versatile Screw Feeder

Swapping rails allows you to accommodate various screw diameters with a single unit. Almost no screw is incompatible.

Supported screw diameter M1.0 ~ M3.0	Supported screw under-head length Longest: 20mm	Capacity About 80cc	Non-ferrous materials: supported
---	--	------------------------	----------------------------------

Manual NSB NSBC
Robotic NSR

⊕ Screws are moved smoothly, and durability has been improved dramatically

- < Improved screw chamber >
Reduces strain on the motor for more efficient screw alignment.
- < Adjustable rail angle >
Allows for adjusting the angle of rail inclination based on the screw being used.
- < Amplitude adjustment >
Allows for calibrating amplitude based on the type of screw being used.
- < No side-to-side vibration >
Alleviates side-to-side rail vibration to achieve smooth screw conveyance.

⊕ Other Key Features

- Compact size does not take up space.
- Use a screw hopper for high-capacity stock of screws.
- The NSR type features a screw take out point with a signal notifying whether a screw is present.
- The NSB type allows for sending out the signal of screw take out through an external outlet.

■ A single unit supports 8 different screw diameters.

- The NSB type supports 8 types of screw diameters by simply swapping rails. (Supports 8 types—from M1.0 to M.30—by default)
- The NSR type supports this through simply swapping the rail and escaper. Clean up oil and other stains easily by removing rail from behind.

NSB rail

NSR rails and escapers

■ One-touch rail swap

Swapping rails is also easy. Also allows you to easily swap rails based on changes in screw diameter. (NSB type)

Manual NSBI
Robotic NSRI NSRI-B (With Brushless Motor)

⊕ Features a rotary escaper

Separates screws one at a time, ensuring they do not intersect for smooth take out.

⊕ Special screws supported

Allows you to stably feed SW screws or those with washers.

⊕ Dramatic improvements in motor durability

NSRI-B: includes a brushless motor. The motor now has a greatly improved lifecycle. (3x greater)

⊕ Flexible support for line changes

Supports screws of varying diameters. Easy installation: simply set into place, and the portable size lets you adapt to line or workpiece changes.

NSRI-B robotic device installation example

NSRI-B robotic device installation example

- Easy installation—simply drop into place. Makes maintenance and replacement easy.
- NSRI/NSRI-B: screw take out point features a signal notifying whether the screw is at the take out point.

Rotating escaper

Escaper

- < Rotating escaper allows for high-speed screw supply >
- Accurately separates screws and supplies them at high speed.
- < Supports low profile screws >
- By default, supports up to 0.35mm (or 0.2mm by special order) low profile screws.
- Separates screws one at a time, ensuring they do not clog at the take out outlet.

Manual	OM-26M
Robotic	OM-26R OM-26RB (With Brushless Motor)

- ⊕ Features a rotary escaper**
Separates screws one at a time, ensuring they do not intersect for smooth take out.
- ⊕ Supports standard bits from various screwdriver manufacturers**
 - Bit screwdrivers
 - Suction screwdrivers
- ⊕ Large capacity: 300 cc**
Supports a stock of 780 M3.0x12mm washer faced screws.
- ⊕ Special screws supported**
Allows you to stably feed SW screws or those with washers.
- ⊕ Dramatic improvements in motor durability**
OM-26RB: equipped with a brushless motor. The motor now has a greatly improved lifecycle. (3x greater)

Magnetically conveys screws along rail for a stable feed.

Rotating escaper

High-capacity screw stock (4x that of the NSB type)
Magnetically conveys screws along rail for a stable feed. Design prevents screws from getting stuck. The rotating escaper also isolates screws one at a time in order to prevent take out errors.

Optional: quantity sensor
OM-26R/M screw quantity sensor (TKA09452)
This is a screw quantity sensor (TKA09452) intended for use with the OM-26R/M Series Automatic Screw Feeder. Combine with the OM-26R/M in order to detect when the screw stock is low and send a signal. Please contact us regarding quantity sensors for other products.

Accessories and bundled items	Instruction manual, AC adapter, hex wrench, adjusting screwdriver, earth wire		

MSF Series Micro-screw Feeder

Supports screws as small as S0.5

Supported screw diameter M0.5 ~ M1.0	Supported screw under-head length Longest: 5mm	Capacity About 15cc	Non-ferrous materials: supported
---	---	------------------------	----------------------------------

*For details, please refer to each product's specifications section.

Robotic MSF

⊕ Accurately and reliably isolates tiny screws

Rotating escaper isolates even tiny screws one by one.

⊕ Space-saving slim design

Compact, 70mm-wide design saves space.

⊕ Simple installation

Easy installation—just set in place.

Example of installation for a robotic device

- Easy installation—simply drop into place. Makes maintenance and replacement easy.
- Screw take out point features a signal notifying whether the screw is at the take out point.
- Rotating escaper ensures accurate screw feed.

SS Series Slim Screw Feeder

Super thin 55mm width is ideal for cell work

Supported screw diameter M1.0 ~ M3.0	Supported screw under-head length Longest: 16mm	Capacity About 40cc	Non-ferrous materials: supported
---	--	------------------------	----------------------------------

*For details, please refer to each product's specifications section.

Manual S-12 SS-23

⊕ Slim design that allows them to be installed next to each other.

In just half the width of the NJ/NS Series, you can fit two units for the space of a single NSB.

⊕ Supports low profile screws

Adjust sensor to support up to 0.25mm screw heads. (factory setting: 0.5mm)

⊕ Adjustable screw conveyor speed

Calibrate amplitude and frequency to achieve the ideal feed speed.

Space-saving for cell works and multiple screw-tightening work

Specifications

Model name	SS-12	SS-23
Exterior dimensions	55(W)×205(D)×143(H)	
Volume (including the rail)	Approx. 2.4kgf	
Power	AC100V ~ 240V DC15V 1A AC adapter	
Drive motor	DC brush motor	
Overload protection/recovery circuit	○	○
Supported screw diameter	M1.0 ~ M2.0	M2.3 ~ M3.0
Supported screw under-head length	Up to 16 mm in length	
Screw capacity	Approx. 40cc	
Accessories and bundled items	Instruction manual, AC adapter, hex wrench, adjusting screwdriver, earth wire

SSI-M / SSI-R Series Slim Screw Feeder

Compact size supports a wide range of assembly workflows and fits anywhere

Supported screw diameter M1.0 ~ M3.0	Supported screw under-head length Longest: 16mm	Capacity About 40cc	Non-ferrous materials: supported
---	--	------------------------	----------------------------------

*For details, please refer to each product's specifications section.

Manual SSI-12M SSI-23M
Robotic SSI-12R SSI-23R

Space-saving slim design

Compact, 65mm-wide design saves space.

Stable rail movement without clog

Horizontal rail system prevents screws from clogging or overlapping, achieving stable feed.

Integrated output designed for use with general counters

Send take out signal from output jack to connect a general-purpose counter.

Rear part description

Frequency
Vibration
Timer

Calibrate screw feed speed by frequency and vibration

SSI rear part

Escaper

- < Rotating escaper allows for high-speed screw supply >

Accurately separates screws and supplies them at high speed.

- < Supports low profile screws >

By default, supports up to 0.35mm (or 0.2mm by special order) low profile screws.

- Separates screws one at a time, ensuring they do not clog at the take out outlet.

Rotating escaper

Supported screw under-head length	Up to 16 mm in length			
Screw capacity	Approx. 40cc			
Accessories and bundled items	Instruction manual, AC adapter, hex wrench, adjusting screwdriver, earth wire			

FM Series

Fixed Quantity Count / External Configuration Type Screw Feeder

Accurately feeds the set number of screws

Supported screw diameter M3.0 ~ M6.0	Supported screw under-head length Longest: 25mm	Capacity About 150cc	Non-ferrous materials: supported
---	--	-------------------------	----------------------------------

*For details, please refer to each product's specifications section.

Fixed-quantity take out FM-36 FME-36
(External Configuration)

⊕ Accurately feeds the number of screws input to counter

Set between 1 and 99. Accurately counts and expels the number you set.

⊕ Stable rail movement without clog

Horizontal rail system prevents screws from clogging or overlapping, achieving stable feed.

⊕ Flexibly supports line changes

Supports screws of varying diameters. Easy installation: simply set into place, and the portable size lets you adapt to line or workpiece changes.

⊕ Long-running operation when combined with screw hopper

FM unit supports 150cc; add screw hopper for additional 400-1600cc stock.

Counter

- Set of 0-99
- Intervals: 0-9999
- Exterior take out signal
- Power outage memory protection feature

Fixed quantity take out with nut support

By special order, we can consider the fixed quantity nut take out model. Please do not hesitate to contact us.

Connect to unit for variable take out quantity (FME-36)

Change the fixed screw feed quantity using a PLC of a variety of manufacturers.

*The PLC interface (NEX-PLC) is exclusively for use with the FME-36.

FM-36 Series

FME-36 Series

Specifications

Model name	FM-36	FME-36
Main component exterior dimensions	130(W)×254(D)×201(H)	
Main component volume (including the rail)	Approx. 6.0kgf	
Main component power supply	AC100V ~ 240V DC15V 1A AC adapter	
Drive motor	DC brush motor	
Overload protection/recovery circuit	○	
External signal line	○	
Brush overload protection mechanism	○	
Number configuration	99 maximum	127 maximum
Supported screw diameter	M3.0 ~ M6.0	
Supported screw under-head length	Up to 25 mm in length	
Screw capacity	Approx. 150cc	
Accessories and bundled items	Instruction manual, AC adapter, hex wrench, adjusting screwdriver, earth wire	
Extension box exterior dimensions	-	155(W)×113(D)×44(H)
Extension box power supply	-	AC100V ~ 240V DC24V 1.9A AC adapter

*Note that some screw sizes may not support take out of 99 units.

LS / LV / LF Series Large Longneck Screw Feeder

Supports screws and bolts with a diameter of up to M8.0 and an under-head length of 50mm. Ideal for feeding screws and bolts for automotive assembly, construction, and renovation applications.

Supported screw diameter M3.0 ~ M8.0	Supported screw under-head length Longest: 25/50mm	Capacity About 1000/1300cc	For iron screws
---	---	-------------------------------	-----------------

*For details, please refer to each product's specifications section.

Manual	LS25-HM LS-50HM
Robotic	LS25-HR LS-50HR
Fixed-quantity take out	LV25 LV50 LF50

⊕ Large capacity

High-capacity stock: between 1000–1300cc

⊕ We are equipped to support a range of needs

Comes with six patterns that you can select based on the type of workpiece and intended use. (Please refer to the suggested take out patterns)

⊕ Rivet supported

Fixed-quantity alignment of rivet is supported. As there is no need for reorientation of rivet in hand, it greatly improves work efficiency.

Supports screws and bolts of 3.0mm–8.0mm diameters

Achieve a stable, horizontal feed even for large workpieces. Configure up to 999 pieces. No need to check screw quantity each time.

BS Series Pneumatic Screw Feeder

Pneumatically feeds screws to their destination in an instant

Supported screw diameter M2.0 ~ M6.0	Supported screw under-head length Longest: 12 / 14 / 25 mm	Capacity About 80 ~ 1300cc	For iron screws Non-ferrous materials: supported
---	---	-------------------------------	---

*For details, please refer to each product's specifications section.

Manual	BS-D
Robotic	BS(S) BS(L) BS-P BS-R
Fixed-quantity take out	BS-C

*BS-P irrespective of material / Other models only for iron screw

Use air pressure to convey screws to distant locations

Brings screws right to you using air pressure, dramatically improving work efficiency.

*The default hose is 2.5 meters long, and it requires air tubing to be installed.

Space-saving and high-capacity in one model

Separating the screw feed from take out points allows for a space-saving design.

Four types based on different needs

BS (for manual and robotic) : pneumatically feeds screw in response to an external signal.

BS-R (robotic take out) : sliding unit conveys screws to screwdriver pneumatically, greatly cutting down on yield time.

BS-C (fixed quantity bulk take out) : takes out the quantity set with the counter and allows for removal by simply pulling the lever.

BS-D (fixed quantity single take out) : takes out the number of screws and bolts you set one at a time next to your hand.

- Screws are pneumatically fed by request through an external signal.
- Screws are fed to the screwdriver's Y pipe with the screw side at the front.
- It is compatible with the screwdriver of screw-tightening robots and manual screw-tightening screwdrivers.

- Screws are pneumatically fed by request through an external signal.
- By placing the screw-feeding part of the slide unit near the screwdriver, it can shorten the time it takes to feed screws to the screwdriver.
- Screws are fed with the screw-head side at the front.
- It is compatible with screw-tightening robots.

- Screws of fixed quantity are taken out in bulk.
- The screw feeder can be placed outside the work space, saving more space for work.
- With fixed quantity take out, it can contribute to preventing screw tightening being forgotten.

- Fixed quantity screws are taken out one at a time.
- The screw feeder can be placed outside the work space, saving more space for work.
- It feeds the screw next to the hand doing the screw-tightening work.
- With fixed quantity take out, it can contribute to preventing screw tightening being forgotten.

Enables Long-running Screw Feeding

Screw Hopper

A sensor detects a screw stock to automatically feed the optimal amount of screws. Use this to make operation management easier.

Supported screw diameter M1.0 ~ M6.0	Supported screw length (total) Longest: 18 / 25 mm	Capacity About 400 ~ 1600cc	For iron screws Non-ferrous materials: supported
---	---	--------------------------------	---

*For details, please refer to each product's specifications section.

SR-80 / NJ-80 Rear-attaching Impeller Style Model

- Easy installation—simply line up next to the screw feeder. It will not take up space on the upper surface.
- Super compact model fits anywhere yet has room for a screw stock of 800cc.
- Use the timer to set the impeller operation time.

Product type

SR-80 model	Supported screw feeder	NJ-80 model	Supported screw feeder
Model number		Model number	
SR-80	NSB / NSR / NSBI / NSRI / NSRI-B	NJ-80	NJ / NJR
		NJ-80F	FM-36 / FME-36

Stock capacity based on the diameter and length of the screw for 800cc:
M2.3x5, approx. 20,000; M3.0x6, approx. 5,600

T-510 Conveyor Style, Surface Mounting Model

- Easy installation—simply align on top of the screw feeder.
- Does not take up floor space; allows you to add more stock vertically.
- Use the timer to set conveyor belt operation time.

Product type

T-510 model	Supported screw feeder
Model number	
T-510S	NSB / NSR / NSBI / NSRI / NSRI-B
T-510J	NJ / NJR
T-510F	FM-36 / FME-36

Stock capacity based on the diameter and length of the screw for 400cc:
M2.3 x5, approx. 10,000; M3.0 x6, approx. 2,800

RHP-160 Side and Rear Attaching High-Capacity Impeller Style Model

- Easy installation—simply line up next to the screw feeder.
- Supports a screw stock of approximately 1600cc.
- Use the timer to set the impeller operation time.

Product type

RHP-160 model	Supported screw feeder
Model number	
RHP-160J	NJ / NJR
RHP-160F	FM-36 / FME-36

FAQ

Q Can I increase screw capacity for the screw feeder?	You can add a screw hopper to add capacity of 400–1600cc.
Q Self-tapping screws are not working as intended. Why?	One possible cause is that M3.5 tolerance screws are intermingled with M3.0 tapping screws. If handling workpieces with large differences in screw tolerance, select a product based on the maximum screw and bolt diameter.
Q I want to use a hexagon socket head cap bolt.	If you are considering a hexagon socket head cap bolt, please inquire at our dealer before placing an order.
Q Can I have model diagrams?	They can be downloaded from our website.
Q Do you support special screw and bolt shapes?	If you are considering a device for a specialized screw or bolt, please print out the Special Order Form from our website, complete it, and submit it to one of our dealers.
Q Can I have extra parts for maintenance?	To purchase extra parts, please contact the dealer where you purchased the product.
Q How can I fix a feeder for a robotic device?	This is described in the product manual available on our website.
Q I want to know more about options.	Please refer to our website.

Signals obtained from signal line

- Manual models : Signal of the screw take out can be obtained.
- Robotic models : Signal of whether there is a screw in the screw take out point can be obtained.
- Fixed quantity take out models : Signal of feed completion for set number of screws can be obtained.

For customers seeking repairs

Print out a repair request form from our website, complete it, and submit it to the dealer where you purchased the product. Include the repair request form with your item to be repaired. If you do not have a printer, please include the details indicated on the right on a piece of paper.

Caution

- The specifications and performance figures of the products described in this catalog are based on our company's design calculations, in-house testing, individual performance testing, product usage results, and official standards/specifications. These are provided for reference purposes only for model selection under normal circumstances.
- The items listed in this catalog may be amended, have their designs changed, or be revised without notice.
- If you are considering using our products under special circumstances, please make sure to discuss technical issues with us beforehand, or conduct a test and evaluation to check the performance on your own responsibility. If damage or injury is incurred without following this process, OHTAKE-ROOT KOGYO cannot be held responsible.
- For safe usage of our products, please make sure to read the instruction manual before using them.
