# MTC-P Multi-Spindle Tester

Equipped with user friendly Data.Pro software, run on a PC connected to MTC-P, can measure up to 12 channels with real time results

## MTC-P

MTC-P is a multichannel Torque/Angle Analyzer for multi-spindle test

### Connectivity to:

- Rotary transducers RMC and RMC TA
- Static transducers SMC and SMCI
- Third party, mV/V torque and torque/angle (encoder) transducers
- Third party, amplified transducers

### Features

- Multichannel torque/angle acquisition
- Save multi-spindle test setup
- Real time results
- Statistics
- Test and traces storage
- Traces view with overlapping function

### Benefits

- Quick and efficient test for multi-spindle tools
- Compact rack design easy to move
- User friendly software
- Store test configurations

➤ Single and compared traces

Multispindle Test with PC Programming

➤ Optional “Trigger” input per for angle synchronization

➤ Storage of the Multichannel test configurations

Statistics Data traceability  
Results database
