# Freedom X: Innovation in your hands

We shape what does not exist. Our primary goal has always been to create customized solutions for our clients to make their work processes more agile, innovative and able to generate an ever-increasing shared value.

What sets us apart is our relentless drive for growth, coupled with the ability to forge strong and high-performing partnerships, thereby adding greater value to the markets we serve.

**Freedom X** is the new torque wrench ideal for all production lines. With a compact and handy design, it easily adapts to any context and application. It can be used in production for complete traceability of the tightening operation by monitoring torque and angle. It ensures high precision in tightening joints.

## Safety and movement: an inseparable connection

### POWERFUL

Performance like a PC.  
Fast Wi-Fi communication.  
Multiple wrench profiles (up to 5). Supports multiple industry protocols at the same time.

### RELIABLE AND ERGONOMIC

Durable compact and easy to handle drop test certified.  
Improved battery life.  
Faster wireless charging.

### PATENTED FEATURES

Wrong hand detection.  
Obstacle detection.

### EASY TO CONNECT

Access and download data from any device connected on the same network of the Freedom X.

### ENVIRONMENTAL

The first wrench in the industry that will achieve a Carbon Footprint certificate ISO 14067!

### USER FRIENDLY

Easy programming via web browser.  
Smart graphics designed for easy use.  
Enhanced sounds, haptic feedback and programmable LEDs.
